Would you prefer university/college to inform you about the events in a app

☐ yes

☐ no

Where have you learn about the venue and time of the event every time

☐ Social media group

☐ Friends

☐ Club member

☐ lecturer

☐ Notice board

☐ Other...

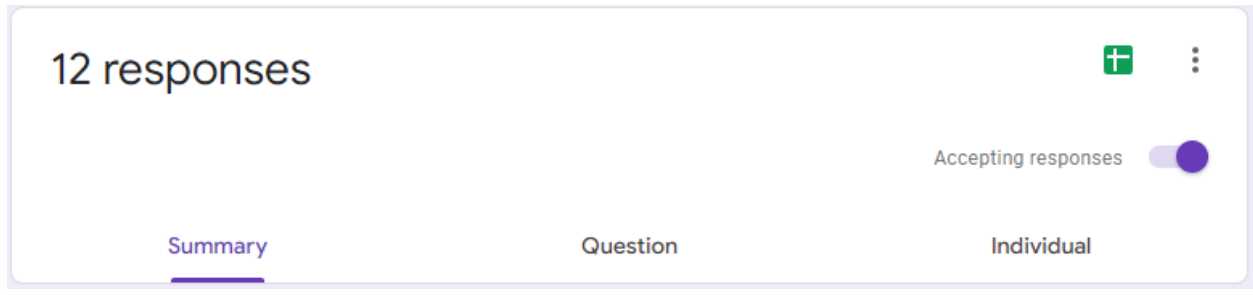

Would you like to get informed thru a app ?

☐ Yes

☐ No

☐ Maybe

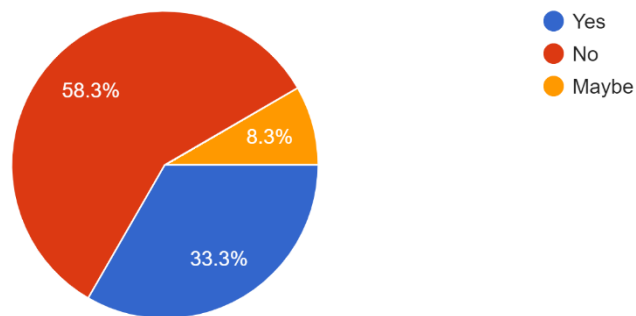

Summary of the questions

Question1

Does the university or college you went has an event app

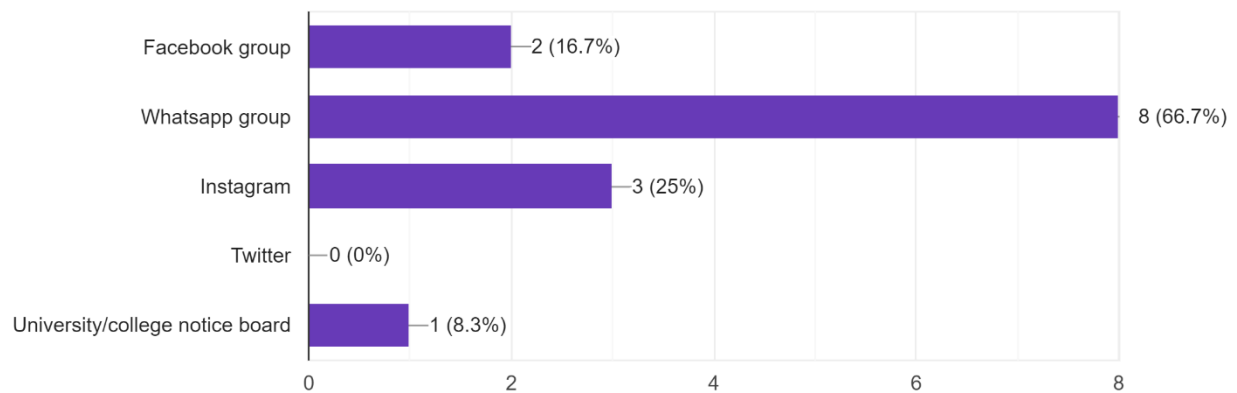

12 responses

Question2

If no, in what platform your university/college use to advertise its event

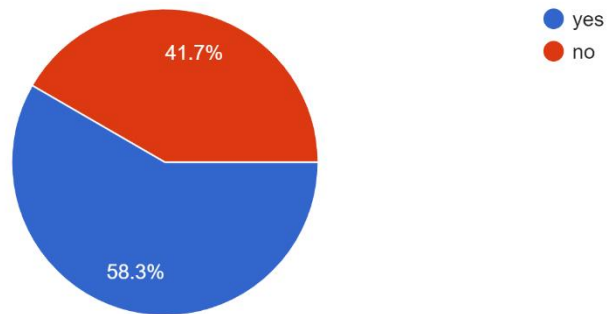

12 responses

Question3

Would you prefer university/college to inform you about the events in a app

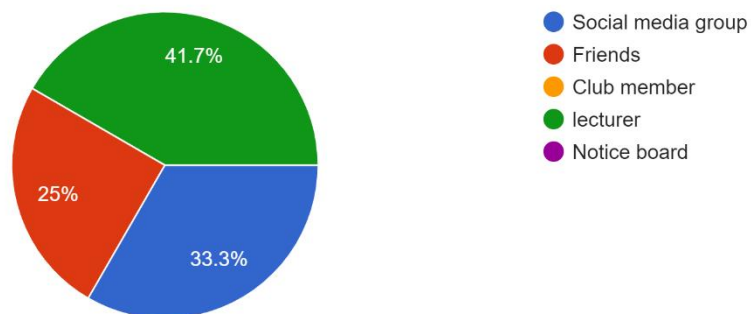

12 responses

Question4

Where have you learn about the venue and time of the event every time

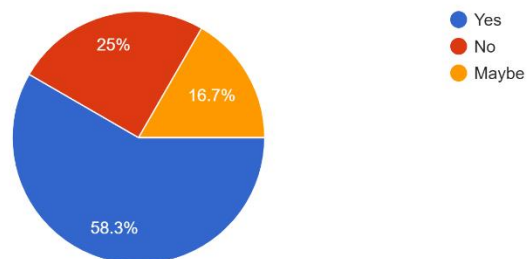

12 responses

Question5

Would you like to get informed thru a app ?

12 responses

User story mapping

Vision

From the responses of the survey, I have concluded that most of the student got notified of the school events by WhatsApp group which is not an effective way to promote school events. It's hard to get all the contact of the student and some students that are interested in joining the event may be left out from joining the WhatsApp group, and a student may find it hard to view and search for the events in WhatsApp as the message of the event may be flooded by the message of other students.

Therefore, I have found a solution to this problem which is developing a school events app. With this app, students are able to view all the events they are interested in more easily. This app will also make the school's admin more ease as they don't have to post events multiple times on multiple platforms and try to attract attention of students. And, from the responses of the survey, more than half of the respondents want to get informed about the event through the app.

This app can be accessed by everyone in the campus. Students and lecturers are able to create and join an event through this app. With this app, I believe that there will be more participants joining an event or hosting an event.
